LENS MARKING

 Platinum is a permanent coating applied on both sides of the lens that gives a high resistance to scratching (1.4 cd / m²) and to the most aggressive chemicals and delays the onset of fogging for two minutes, as per the testing requirements of EN166.

- I.** The letter 'I' signifies 'Medium Impact' approval.
- O.** The letter 'O' signifies that the product has been approved for the use both outdoors and indoors, and the terminology used by Australian standards is 'outdoor un-tinted'. This marking appears on all clear, amber and contrast lenses.

Ocular lens category:

- O.** Range of luminous transmittance 80-100% (Clear).
- 3.** Range of luminous transmittance 8 -18% (Smoke).

TECHNOLOGIES

The new exclusive scratch and fog resistant PLATINUM® coating guarantees even more safety, reliability and comfort. Washable (water and soap), this permanent coating applied on both sides of the lens makes it highly scratch resistant and effectively delays the appearance of fogging.
