+ CLEAR BALLISTIC LENS, 2 SPARE LENS, A STRAP AND A CARRY SOFTY CASE INCLUDED.

The newest generation of hybrid ballistic spectacles, STANAG 4296, EN166, EN170 and EN172 certified. COMBAT protective spectacles with 'PLATINUM' coating provide unique adaptability thanks to their easy-to-change mono-lens in clear, smoke and CSP versions.

'PLATINUM' (P) ASAF Coating

Permanent coating on both sides of the lens gives them a high resistance to scratching, and delays the onset of fogging. Certified K & N (EN166) PLATINUM® is resistant to the most aggressive chemicals.

CSP

This innovating coating is an effective solution for all activities that alternate exposure to bright light and low light, while also being suitable for extreme hot and cold temperature environments. CSP is also combined with the exclusive PLATINUM® coating that sustainably combats fogging.

Clear and smoke spare lenses available on demand. Consult your sales representative for more information.

* Available while stocks last.

Lens markings

Optical class symbols:

1. Continuous work

Mechanical strength symbols:

F. Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s

T. The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.

Others symbols:

K. Resistance to surface damage by fine particles

N. Resistance to fogging

C € European standard Manufacturer name

Bollé Safety product approval certificates to CE standards will be sent on request.

Frame markings

Standards :

EN166, guaranteed minimum resistance of the protective eyewear against everyday risks including dropping the protective eyewear onto the ground, ageing by light exposure, exposure to heat or corrosion etc.

Mechanical strength symbols:

F. Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s

T. The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.
